

# 10 years of photovoltaic panel installation

## Overview

---

The solar panel payback period is how long it takes your savings to begin exceeding the expense of the installation. 1 On average, residential solar installations in the U. pay for themselves within 7 to 10 years, although this varies. It takes a homeowner an average of about 10 years to pay off the initial investment but it may be several years less for some and more for others. So in this article, we'll explore: What is a good payback.
