

# 13th Five-Year Solar Power Generation Policy

## Overview

---

According to China's 13th Five-Year Plan and 13th Five-Year Plan for Energy Development, focusing on solar power industrial upgrading, cost reducing, application expanding, the plan specifies the aims for solar power development, explains the guidelines and main targets during. According to China's 13th Five-Year Plan and 13th Five-Year Plan for Energy Development, focusing on solar power industrial upgrading, cost reducing, application expanding, the plan specifies the aims for solar power development, explains the guidelines and main targets during. According to China's 13th Five-Year Plan and 13th Five-Year Plan for Energy Development, focusing on solar power industrial upgrading, cost reducing, application expanding, the plan specifies the aims for solar power development, explains the guidelines and main targets during 2016-2020. By the end. According to China's 13th Five-Year Plan for Economic and Social Development, 13th Five-Year Plan for Energy Development, and Renewable Energy law, in order to achieve the aim for 2020 and 2030 that the fossil fuel consumption presents respectively 15% and 20% of primary energy, and promote. Electricity generation by the U. electric power sector totaled about 4,260 billion kilowatthours (BkWh) in 2025. In our latest Short-Term Energy Outlook (STEO), we expect U. 6% in 2027, when it reaches an annual total of 4,423 BkWh. The. The 13th Five-Year Plan (FYP) (2016-2020)—ratified by the National People's Congress (NPC) in March 2016—established Chinese President and General Secretary of the Chinese Communist Party (CCP) Xi Jinping's vision for China's development over the next five years. The Plan sets. make up China's 13th Five-Year-Plan [FYP] period. Here, we review the rst place, followed by wind/solar and then nuclear. The change 018, 165GW tional Energy Administration on 1st of August 2017. The document provides guidelin 4th fi India and State Governments to promote solar power.

## 13th Five-Year Solar Power Generation Policy

---

### The 13th Five-Year Plan

The 13th FYP also broadens the Chinese government's stated commitment to innovation, emphasized in the 12th FYP, and to improving citizens' quality of life, an effort that began under the 11th FYP ...

### [Notice on Formulation of the 13th Five Year Plan for Solar Power](#)

Notice on Formulation of the 13th Five Year Plan for Solar Power Poverty Alleviation - policy from the IEA Policies Database.

### [13th Five-Year National Energy Development Plan.](#)

This National Plan is a sectoral policy document, which represents the basic outline of China's energy policy from 2016 to 2020, and aims to optimize energy system, promote energy product and ...

### [13th Five Year Plan for Renewable Energy Development, ESCAP ...](#)

By 2020, the proportion of non-hydro renewable energy generation and coal-fired power generation in power generation enterprises should be significantly increased.

### [13th Five-Year Plan for Solar Power Development . ESCAP Policy](#)

According to China's 13th Five-Year Plan and 13th Five-Year Plan for Energy Development, focusing on solar power industrial upgrading, cost reducing, application expanding, the plan specifies the aims for ...

### [Solar power generation drives electricity generation growth over the](#)

U.S. generation fueled by coal increased by 13% in 2025 to 731 BkWh due to cold temperatures in some regions and because of relatively higher natural gas prices. With existing ...

### [National Solar Power Generation 13th Five-Year Plan](#)

The 13th Solar Energy Development Five Year Plan (2016-2020) was adopted by National Energy Administration on 8th of December 2016 establishing targets for solar

## C: Solar Power

China's 13th Five-Year Plan for Solar Energy Development contained specific goals for solar technology innovation, including commercialized monocrystalline silicon cells with an efficiency of at least 23% ...

### [Trends and Contradictions in China's Renewable Energy Policy](#)

In this commentary, Anders Hove examines China's recent energy policy announcements and their implications for the 14th Five-Year Plan, which will set energy policy for the ...

### [Optimization of China's provincial renewable energy installation plan](#)

Based on the newly proposed provincial renewable portfolio standards for 2020, an integrated planning model composed of a multi-regression model and linear planning model was ...
