

350kW inverter cabinetized unit price reduction

Overview

At the highly anticipated 3rd Annual Product Innovation Day, CPS America unveiled a 20% price reduction on its 350kW 3-phase string inverter as well as 5MWh Battery Container products. Its primary function is to convert direct current (DC) electricity—typically generated by solar panels or stored in batteries—into usable. Solis' largest three-phase, 1500 VDC PV string inverter has 12 MPPT (250, 300 and 350) or 16 independent MPPTs (350K) options that allow for great redundancy in larger systems. Redundancy through a distributed method supports overall system uptime. Multi-mppt string inverters from Sungrow, sg350hx, are proven safe for 24h real-time AC and DC insulation monitoring and reach a high yield of 99% at a low cost.
