Advanced Rocketry

If you are a modpack developer or just want to customize and build your own solar system, check out the Configurations link at the top.

Advanced Rocketry

Mine and explore planets and moons within solar systems and travel to them via your own custom built rockets rockets and warp ships. Build space stations and look down on any planet from above.

Advanced Rocketry

The Solar Generator is a solar panel that generates a small amount of power just by being in sunlight. The panel will work as long as it has a direct line of sight to the sky (it does work under glass blocks) ...

Advanced Rocketry

It adds custom rockets to travel to asteroids, planets, space stations, and satellites. Its machines use Redstone Flux and multiblock structures for most of its devices. One tool of note is the ...

Advanced Rocketry

The array is constructed of two power output hatches and up to 63 solar array panels. Additionally, the solar array is more efficient and should be used in place of giant arrays of solar panel generators, to ...
