

Afghanistan beer solar power generation home

Overview

The Islamic Emirate of Afghanistan on Thursday officially launched construction of a 40-megawatt solar power generation project in Mohammad Agha District of Logar Province, marking a major step in the country's drive toward energy self-sufficiency. Renewable energy in Afghanistan includes biomass, geothermal, hydropower, solar, and wind power. With a population of less than 35 million people, it is one of the lowest energy consuming countries in relation. Its electricity is provided mainly by two sources, the Kajaki hydroelectric power station in neighboring Helmand Province and solar farms on the outskirts of the city. is a landlocked country surrounded by five other countries. The power plant will have a generation capacity of 40 megawatts, and the substation will have a capacity of 126. From 523 MW in 2024, Afghanistan aims for up to 5 GW renewable energy capacity by 2032. 2 MW from wind and 5 MW from solar energy. This initiative marks a pivotal step toward national.
