

Angola to add solar module project

Overview

Sun Africa has completed a 370 MWp solar PV project in Angola, consisting of seven utility-scale solar plants in the provinces of Benguela, Huambo, Bié, and Lunda Norte. Developed in partnership with MCA Group and Hitachi Energy, the project is the largest solar initiative in sub-Saharan Africa. Angola has set a target of 60% access to electricity by 2025 under the strategic plan 'Visao 2025,' of which solar is poised to play a central role. Supporting electrification as well as diversification, solar projects are being rolled out by the government alongside international partners and. The solar plants form part of Angola's strategy to shift toward green energy and reduce reliance on diesel generators and thermal energy. Image: The Bailundo Photovoltaic Park in Huambo province was inaugurated in early September. With 1+ million high-efficiency panels across seven locations, this 370MW project can power over two million residents.

Angola to add solar module project

Angola completes 370MW solar project

Angola completes landmark 370MW solar project, powering 2.4 million people and cutting 1M tonnes of CO2 annually through seven renewable energy parks.

[Angola Energy News: Nation Completes 370 MW Solar Project](#)

Angola has completed a major 370 MW solar power project, significantly boosting its renewable energy capacity. The initiative features seven solar power plants strategically located ...

The Angola Solar Project

When Angola wanted to strengthen their national electricity system, diversify their energy matrix, and reduce their dependence on fossil fuels, they turned to Sun Africa. The result is the Angola Solar ...
