

Overview

of Treasury and the Internal Revenue Service (IRS) finalized rules (Notice 2025-42) to clarify what defines “start of construction” for a solar project in order to qualify for federal tax credits. Here is an overview of the new rules and a quick recap of how we got here. Projects must now show significant physical work started before July 5, 2026. In the July 2025 “ One Big Beautiful Bill Act, ” Congress terminated key aspects of the Investment Tax Credit (ITC) for solar and wind projects and created barriers for projects pursuing energy storage and other zero emissions technologies. The credit for solar upgrades was extended through 2025, empowering more homeowners to switch to solar. Find out if you qualify and learn how to claim the solar tax. The owner of a qualified solar facility may claim the investment tax credit (“ITC”). The ITC is a one-time credit against income tax that is based on the amount invested in a facility (rather than on the amount of electricity produced and sold).

Are solar panels considered new energy projects
