

Are there any buyers for old photovoltaic panels

Overview

Some buyers specialize in giving old panels a new lease on life. These secondary market dealers purchase used panels, refurbish them, and then sell them at a markup. Pre-owned solar panels are sold in their original state, straight from their previous setup. They might show signs of wear and tear but typically remain functional. Refurbished solar panels, however. Before diving into where to sell, it's important to understand that used solar panel buyers typically fall into three categories: homeowners seeking budget-friendly solar solutions, off-grid enthusiasts building DIY systems, and contractors sourcing equipment for smaller projects. Understanding who buys these panels is crucial for sellers looking to maximize their investment and for buyers seeking affordable renewable energy. We partner with EPCs, solar installers, contractors, real estate developers around the world that want to recycle excess new and used/ old solar panels and equipment. Local classifieds and community bulletin boards can also provide valuable leads for purchasing used panels. The primary reason for this is the cost to recycle, which varies from \$15 to \$45 per panel.

Are there any buyers for old photovoltaic panels
