

# Argentina Power Grid Energy Storage Frequency Regulation Project

## Overview

---

The international tender, first announced in February, aimed to secure 500 MW of energy storage capacity for critical points in the Buenos Aires Metropolitan Area (AMBA) grid. In a strong show of interest, 15 companies submitted 27 different project proposals. The Argentinian government opened the bids this week for its AlmaGBA tender process. The first large-scale battery energy storage tender in Argentina is catching the attention of the international community as an unequivocal step towards modernizing power infrastructure. Intended to strengthen the grid in the greater Buenos Aires region, the program has attracted a lot of interest. Privatisation of the Power Industry and Sanction of the Regulatory Framework During 1989, privatisation took place in relation to many of the assets the national government had in the power industry, including the units of generation, transportation and distribution of energy.

# Argentina Power Grid Energy Storage Frequency Regulation Project

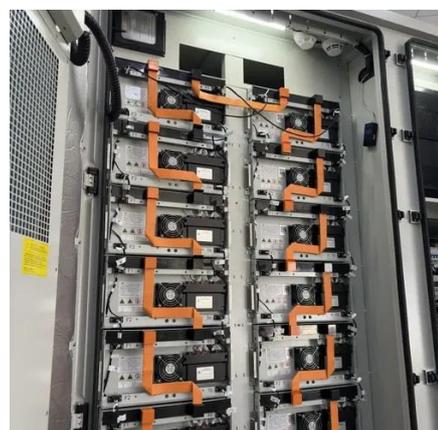

## [Buenos Aires Battery Storage: \\$540M Energy Project Advances](#)

The "Alma-GBA" initiative, as it's known, signals a decisive shift towards leveraging battery energy storage systems (BESS) to enhance grid reliability and prepare for a more ...

## [Argentina Receives 1.3GW of BESS Proposals for First-Ever 500MW ...](#)

This national and international open call, part of Resolution SE 67/2025, marks Argentina's first large-scale effort to integrate new electricity storage infrastructure into urban ...

## [Buenos Aires Power Grid Energy Storage Frequency Regulation ...](#)

Buenos Aires, Argentina's bustling capital, faces growing energy demands as its population exceeds 15 million. The Buenos Aires Power Grid Energy Storage Frequency Regulation Project addresses ...

## [Power Generation, Transmission & Distribution 2025](#)

The project is part of Argentina's broader energy modernisation agenda and seeks to attract private investment under a transparent and competitive framework. Supported by international ...

### [Argentina's Oversubscribed Energy Storage Tender Signals](#)

The first large-scale battery energy storage tender in Argentina is catching the attention of the international community as an unequivocal step towards modernizing power infrastructure.

### [Buenos Aires Power Generation Energy Storage Frequency ...](#)

Summary: Discover how Buenos Aires is leveraging advanced energy storage systems to optimize power generation frequency regulation. This article explores the project's technical framework, ...

### [Argentina's first energy storage tender secures 1.35 GW of bids](#)

The international tender, first announced in February, aimed to secure 500 MW of energy storage capacity for critical points in the Buenos Aires Metropolitan Area (AMBA) grid.

### [Argentina's first energy storage tender receives 1.347 MW of bids](#)

The goal of the initiative is to improve the electricity grid's reliability, reduce marginal costs, and guarantee supply during peak demand, helping to prevent blackouts.

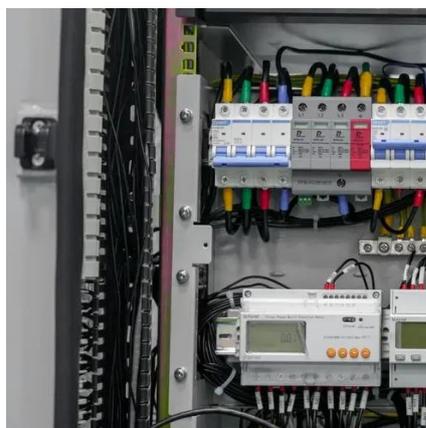

### [Argentina's Power Reforms: Aims to promote efficiency and private](#)

This is significant in relation to the government's ongoing tender for battery storage systems, which aims to add 500 MW of storage capacity to the grid. The tender received an ...

### [Argentina's First Battery Energy Storage Systems Tender Draws 1.3 ...](#)

In a global context where energy storage is becoming critical for grid reliability and decarbonization, Argentina's over-subscribed tender illustrates the appetite for scalable, bankable ...
