Energy in Azerbaijan

Most electricity is generated by gas-fired power plants. [3][4] Energy in the country is produced using all types of sources, including fuel, renewable energy, water energy, electrical and heat energy.

Energy in Azerbaijan

OverviewHistoryOilNatural gasElectricityReport of 2017Foreign investment competition with non-energy sectors

Two-thirds of energy in Azerbaijan comes from fossil gas and almost a third from oil. Azerbaijan is a major producer of oil and gas, much of which is exported. Most electricity is generated by gas-fired power plants. Energy in the country is produced using all types of sources, including fuel, renewable energy, water energy, electrical and heat energy. Corruption in Azerbaijan is alleged to

be connected to the oil and gas industry, which is very important for

Azerbaijan

Unlike other energy commodities such as coal, oil and natural gas, electricity trade between countries is relatively limited as it is more technically complex and requires a direct cross-border interconnection.
