

# Beijing promotes new energy storage

## Overview

---

12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems. The country aims to achieve more than 180 million. China plans to have its battery storage capacity more than double to 180 gigawatts (GW) by 2027 in a new plan aimed at attracting \$35. 1 billion (250 billion Chinese yuan), the authorities said on Friday. The overcapacity in batteries and solar cells will continue to drive global prices down. According to the latest Implementation Plan for Development of Beijing's New-type Energy Storage Industry (2024-2027) (hereinafter referred to as the Plan), by 2027, Beijing's new-type energy storage industry will achieve high-end, intelligent, and green development, with the revenue expected to. China has unveiled plans to boost its energy storage sector as it strives to shore up its energy security and cope with a surge in power demand from emerging industries such as artificial intelligence. The action plan, which was jointly issued by eight government departments, includes measures to. A drone photo taken on Aug 8, 2025 shows a demonstration project for integrated photovoltaic and energy storage in Dongying, East China's Shandong province.

## Beijing promotes new energy storage
