

Black solar power generation share

Overview

The SEIA backed this statement with a 2019 study, showing that only 7.6% of the solar workforce is Black or African American. is the nation's largest network of underrepresented professionals in the solar photovoltaic (PV) industry. Our members include entrepreneurs, financiers, veterans, attorneys, engineers, contractors, developers, and other industry leaders. collaborates with for-profit, non-profit. Ajulo Othow is trying to fix racism and climate change at the same time. The Solar Foundation, along with the Solar Energy Industries Association, published a diversity report earlier this year that found that executive leadership in solar companies is almost exclusively. Given the incredible job growth of the energy sector over the past decade, this lack of diversity threatens to cause women, Hispanic and Latino workers, and Black workers in particular to miss out on one of America's great economic expansions. As we enter Black History Month — a time dedicated to honoring the triumphs, struggles and contributions of Black people throughout U. history — we're reflecting on ways.

Black solar power generation share
