

CTG energy storage vanadium battery

Overview

This massive "liquid power bank" stores and releases energy through the changing oxidation states of vanadium, offering high safety, 100% recyclability, and a lifespan of over 20 years. Its incredible stability even makes it a potential power source for future lunar exploration. Have you ever seen a battery made of "water"?

In Xinjiang, China, the world's largest vanadium redox flow battery (VRFB) station is now fully operational. The start of operation of Jimusaer Vanadium Flow Battery Energy Storage Project, a. Paired with 1 GW solar plant, Rongke Power has developed the storage project partnership with China Three Gorges Corporation (CTG), addressing renewable energy intermittency and grid congestion in the region.
