

Cabine hydrogen power generation

Overview

The Eco-CH2 Cabinet and Cage brings sustainable energy to your site with cutting-edge hydrogen fuel-cell technology. Powered by the BOC Hymera fuel cell, it converts hydrogen and ambient oxygen into clean, efficient direct current (DC) power. This could range from examples such as a stand-alone system, a backup power system or as an uninterruptible. A MicroGrid is an individual or personal energy grid for your home or business. This means you can disconnect from the traditional power grid and operate autonomously.
