Q& A
Lithium-ion (Li-ion) batteries
Li-ion batteries are famous for their high energy density and efficiency. They can easily keep large energy amounts like 12V 500Ah and gradually let it go when needed. This makes them ideal for solar systems. They are light and can be charged frequently with no bad effects. Because they are effective...
Lead-acid batteries
Lead-acid batteries, like the 12V 500Ah deep cycle battery, store energy for a long time. They power up heavy devices, but they weigh more compared to Li-ion batteries. Even though they become outdated, lead-acid batteries are cheaper and work well when paired together. RVs and boats still use these batt...
