Overview

The 2 million kW PV demonstration project by the China National Nuclear Corporation (CNNC), one of the country's largest nuclear power operators, integrates PV and nuclear power, which can effectively reduce the negative impact on the marine ecosystem and supply more clean energy. The 2 million kW PV demonstration project by the China National Nuclear Corporation (CNNC), one of the country's largest nuclear power operators, integrates PV and nuclear power, which can effectively reduce the negative impact on the marine ecosystem and supply more clean energy. Construction of China's largest offshore solar farm officially commenced at Haibin harbor in Lianyungang city, East China's Jiangsu Province on Sunday, China National Nuclear Corp (CNNC) said, another milestone in the country's intensifying green transformation in aligning with its carbon. The facility will save 680,000 tonnes of standard coal and reduce carbon dioxide emissions by 1. The project is expected to reduce carbon dioxide emissions by 1. Credit: Avigator Fortuner/Shutterstock. (Yicai) May 20 -- China National Nuclear Power has kicked off the construction of the country's largest offshore solar power plant next to the company's nuclear power station in eastern Jiangsu province. CNNP started building the Tianwan Offshore Photovoltaic Power Station, with a total investment. Being developed at Haibin harbor in Lianyungang city, the pilot project entails an investment of CNY9. 38bn) CNNP breaks ground on 2GW offshore solar PV farm in China.
