

# China s power companies wind power installed capacity

## Overview

---

So far, China's newly added grid-connected wind power generation capacity has exceeded 57. This achievement highlights the country's commitment to rapid and stable growth in wind. (Yicai) Jan. 29 -- China's combined installed capacity of wind and solar power has exceeded 1,800 gigawatts for the first time last year, as its gap with thermal power, whose primary sources are fossil fuels, continues to expand. u2028A total of 72,2 gigawatts (GW) of new capacity were added between January and June 2025, following 44,1 GW installed in the first half of. As of 2024, China had an installed wind power capacity of \*\*\* gigawatts. It is the first national public platform approved by CNCA, which is able to provide offshore w e construction of offshore wind industry clusters. The focus is on building offshore wind bases in Guangdong, Fujian, Zhejiang, Jiangsu and Shandong.

## China's power companies wind power installed capacity

[China: installed wind power capacity 2024. Statista](#)

Wind has seen the greatest year-on-year power generation capacity growth in China. The large investments in wind energy are paying off, and China has emerged as the global leader in

[China's Wind, Solar Power Installed Capacity Exceeded 1,800 GW for](#)

China's wind and solar power installed capacity totaled 1,840 GW at the end of 2025, according to data released by the National Energy Administration yesterday.

[MONTHLY CHINA ENERGY UPDATE , February 2025](#)

In CY2024, China hit a new record of annual net new capacity added to the grid at 429GW, a 21% y-o-y increase. Of this, wind and solar power combined capacity accounted for 83% at 356.5GW, dwarfing ...

### GEM China wind & solar brief July 2024

Wind and solar now account for 37% of the total power capacity in the country, an 8% increase from 2022, and widely expected to surpass coal capacity, which is 39% of the total right now, in 2024.

### [Current Development and Prospect of China's Wind Power Industry](#)

By the end of 2023, China's cumulative installed capacity of wind power is 441 million kW, ranking first in the world for 14 consecutive years.

### [China tops world in installed wind power capacity for 15 years](#)

China's installed wind power generation capacity has consistently ranked first in the world for an impressive 15-year streak, according to the latest data released by the China Electricity ...

### [China's installed power generation capacity up 18 pct](#)

Wind power generation capacity stood at 580 million kilowatts by the end of August, rising 22.1 percent year on year, according to the NEA data. In the first eight months of 2025, China's ...

### [FACTSHEETS SERIES ON CHINA ENERGY TRANSITION ...](#)

By the end of 2023, China's cumulative installed capacity of wind power was 441 GW, an increase of 20.7% y-o-y. Wind power thus accounted for 15% of the total installed power, of which 404 GW was ...

### [The Status and Prospects of Offshore Wind in China](#)

China's 2030 carbon peak and 2060 carbon neutrality goals s by adopting more vigorous policies and measures. We aim to have CO2 emissions peak bef From 2002,1000-fold increase in installed wind ...

### [WWEA Half-year Report 2025: Global Wind Power Growth ...](#)

China remains by far the world's largest wind power market.u2028In the first half of 2025, the country installed 51,4 GW, more than double the capacity added during the same period in 2024 ...
