

Copenhagen island microgrids

Overview

The ambition is for the island to be established by 2030, at the latest, and connect 3 GW of offshore wind. Over time, the island will connect 10 GW offshore wind and host energy storage and Power-to-X as well as accommodation, O&M facilities, and HVDC converters for transmission. Plexar Energy will focus on the industrialization of microgrids, co-located production and consumption in battery-balanced energy systems. 5 million CI Microgrid Electrification Fund. Copenhagen Infrastructure Partners and PensionDanmark launch microgrid specialist company Plexar Energy, which will develop, install and operate microgrids. The new company will tap into the growing commercial potential for.
