

District heating network map

Overview

Since conditions from city to city differ, every district heating system is unique. In addition, nations have different access to primary energy carriers and so they have a different approach on how to address heating markets within their borders. Since 1954, district heating has been promoted in Europe by Euroheat & Power. They have compiled an analysis of district heating and cooling markets in Europe within their

District heating network map

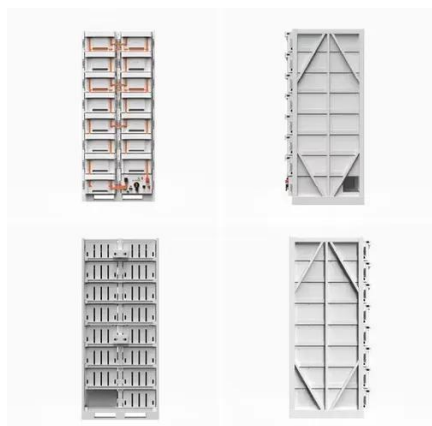

District Heating Network

This concept map provides a comprehensive overview of the components and processes involved in district heating systems, from heat generation to end-user applications.
