

Do photovoltaic panels need cleaning agents

Overview

In order to clean the photovoltaics sustainably, we recommend a cleaning agent that prevents further soiling. This prevents staining despite the high lime and mineral content of the tap water. If you have. Whether or not you might need to clean your solar panels really depends on a few main factors: the angle of your panels and your geography. If they're lying flat, there's a higher probability of muck sticking to the panels. While it is recommended by most.
