

Drilling side holes on site for photovoltaic brackets

Overview

While it is possible to drill holes into the side of solar panels without damaging them, it is important to note that altering or modifying solar panels may void their warranty. This blog post will delve into the complexities of drilling into solar panels, exploring the potential risks and benefits, and offering expert advice on when and how. Oftentimes, this may involve drilling holes into the side of the solar panels to attach them to mounting brackets or frames.
