

EK PV Inverter Knocking

Overview

There may be several reasons why your inverter may be clicking, including the inverter being overloaded, needing a reset, or a problem with the AC coupler. If a clicking sound is accompanied by a flashing light on the inverter, this may indicate something seriously. While solar inverters are designed to operate quietly, a faint hum, occasional clicking, or low buzzing is perfectly normal under most conditions. Understanding what causes these noises and how to manage them is essential for maintaining your system's efficiency and ensuring peace of mind. In this. My solar inverter clicked every 30 seconds for weeks until I discovered these 5 simple causes. Get the real fixes from someone who's installed 500+ solar systems. This is a common problem that can often be solved quickly and easily. Swears he didn't start that fire.
