

Energy Storage Systems

Overview

The Static Transfer Switch (STS) is a core component of energy storage systems, capable of completing power switching within milliseconds. This ensures uninterrupted power for critical loads while enhancing operational efficiency. Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series. Focusing exclusively on STS applications, we examine the operational principles, control methodologies, and. Our PCS (Power Conversion System) consist of converters, control system, transformer & switch gear. Thanks to its modular design we can quickly configure PCS for Commercial&Industrial Energy Storage System.
