

Energy company uses 1standard power scale smart photovoltaic energy storage cabinet

Overview

EK photovoltaic micro-station energy cabinet is an integrated intelligent energy storage device designed for distributed energy scenarios, providing 10-50kWh multiple capacity options (models: EK-Micro-10 to EK-Micro-50). Built to strengthen the grid, our energy storage systems are developed to. In 2006, Sungrow ventured into the energy storage system (ESS) industry. Relying on its cutting-edge clean power conversion technology, industry-leading battery technology and grid forming technology, Sungrow focuses on integrated energy storage system solutions. It can store electrical energy and release it for power use when needed. It is usually used to provide backup power and stabilize grid. Adding Containerized Battery Energy Storage System (BESS) to solar, wind, EV charger, and other renewable energy applications can reduce energy costs, minimize carbon footprint, and increase energy efficiency.
