

Energy efficiency bosnia and herzegovina

Overview

With regard to energy efficiency, the 2023 national energy and climate plan (NECP) set the targets for up to 2030: 6.84 Mtoe for primary energy consumption and 4. Recently adopted environmental strategies define measures to improve energy. To get an accurate picture of energy efficiency in a country, it is important to first look at how and where energy is being used. Total final consumption (TFC) is the energy consumed by end users such as individuals and businesses to heat and cool buildings, to run lights, devices, and appliances. The indicator shows the final consumption of energy by end users for all energy uses. 5–30% of this share) and. In a move to bolster infrastructure and energy efficiency in Bosnia and Herzegovina, the European Union (EU) and the European Bank for Reconstruction and Development (EBRD) have announced substantial financial support for two pivotal projects in Tuzla Canton and Sarajevo. Energy Efficiency in Tuzla. . The Programme gave grants to municipalities to implement EE/RES projects.
