

Environmental sustainability dushanbe

Overview

A Green City Action Plan (GCAP) will examine the sectors affecting environmental conditions, including transport, energy, industry, land use, waste and water. Based on this, actions and visions will be established to guide the city toward a more green and sustainable future. In 2012, the city joined the EBRD Green Cities program and began developing its Green City Action Plan (GCAP) to tackle long-standing environmental challenges and set a new course for implementation of the UN Sustainable Development Goals in the context of its boundaries regarding its economic system or degree of development. Excerpts may be reproduced without authorization, on condition that the source is indicated. Representatives of Central Asian countries today acknowledged the urgent need for regional cooperation in green development and committed to strengthen collaboration across critical sectors, including energy, trade digitalization, trade integration, trade facilitation, investment promotion, SME. Final Report update. Dushanbe City Boundaries.
