

Europe talks about solar power

Overview

The EU solar sector continues its upward trajectory, with mid-2025 figures confirming robust growth. SolarPower Europe's latest analysis highlights record installations, policy momentum, and the technology's central role in the continent's clean energy transition. From 17-18 February 2026, the SUPERNOVA project will organise three sessions at the Solar Quality Summit Europe 2026 conference in Barcelona. Renewables accounted for close to half of electricity generation in the European Union (EU) in 2025, marking a shift from a. The EU has doubled its solar capacity in the last three years. The Netherlands and Greece were the top solar record setters, while wind power also hit new highs in May and June. New data from energy think tank Ember shows that solar accounted for 22.

Europe talks about solar power

[The Future of Solar Power in Europe - Present Situation and the ...](#)

Europe's solar story has shifted from small-scale experiments to record-breaking transformation. In 2024, the EU added 65 GW of new capacity, making solar supply about 11% of ...

EU Solar Output Tops 340 TWh in 2025, Lifting Renewables to Nearly ...

This shift comes as solar generation reached a record level in Europe in 2025, according to the report, producing more than 340 TWh. This lifted solar's share in the EU power mix to 12.6%, its ...

EU solar energy rollout slows for first time in decade as subsidies cut

BRUSSELS/BERLIN, July 24 (Reuters) - The European Union's expansion of solar energy is on track for its first annual slowdown in more than a decade, industry data showed on Thursday, as some

['Europe is becoming a solar powerhouse': Solar tops EU electricity as](#)

Europe can partly credit its solar success to overwhelming public support for renewable energy sources, especially when they offer visible economic benefits. The European Commission ...

European Electricity Review 2026 , Ember

The EU's electricity transition reached a new milestone in 2025 with wind and solar generating more power than fossil fuels.

[Europe's Solar Energy Market in 2025 , SolarToday](#)

Over the past decade, solar energy has become a cornerstone of Europe's transition to clean energy. Thanks to ambitious climate targets, widespread public support, and falling costs, solar ...

[Europe's Solar Power Growth Set to Dip for First Time Since 2016](#)

Solar power additions are set to contract 1.4% in the EU, the first annual dip since 2016, according to a report from industry group Solar Power Europe.

[EU Market Outlook for Solar Power: 2025 Mid-Year Analysis](#)

The EU solar sector continues its upward trajectory, with mid-2025 figures confirming robust growth. SolarPower Europe's latest analysis highlights record installations, policy momentum, ...

How Europe is paying for its solar boom

The EU has doubled its solar capacity in the last three years. How have subsidies made this possible, what support is still available, and what still needs to happen?
