

Free solar power station for home use

Overview

The federal government does not provide free solar panels, but many states and utilities offer incentives that can reduce the cost of going solar. You can install solar panels on your roof with no upfront cost by signing a lease or PPA or taking out a \$0-down loan. The ITC — also known as the Federal Solar Tax Credit — is a popular tax rebate program offered by the US Federal Government for homeowners looking to switch to clean, renewable solar power. In August of 2022, the United States Congress extended the ITC while at the same time raising the total. These offers often refer to solar leases or power purchase agreements (PPAs), financing options where a solar company installs panels on your property without requiring a down payment. Like with most free things, these solar programs have a catch (spoiler alert: they aren't actually free).
