

Hospital Use of Bissau Folding Container Hybrid Type

Overview

• Normeca AS is introducing a hybrid model: A central hospital unit and smaller medical clinics all based on flat-packed containers that may be connected and designed according to the need and purpose with a very short building period. The concept was tried and tested in. Mobile hospital container uses a folding structure design. Generally, it takes only 5 minutes to set it up. It is only 57cm high after folding and can be easily moved and reused in different transportation modes around the world. You can use medical containers for emergencies such as natural. Shipping containers can be helpful additions to existing hospitals and health-care facilities, but they can also be self-sufficient container hospitals themselves. Beyond the immediate need for stockrooms, medical storage containers can be rapidly configured as clean rooms, procedure spaces, triage bays, and mobile clinics.
