

# How long does it take to install 100 000 photovoltaic panels

## Overview

---

Because between design, permitting, scheduling, installation, and final inspections, property owners can expect to wait 60-90 days, on average, before the panels can be switched on and their meters start spinning backward. While panels may only be on your roof for a short time, the full process includes planning, design, permitting, inspections, and utility approvals — all of which are essential for safety and long-term performance. In 2026, most residential solar projects are completed within a few months, while. If you're thinking about installing solar panels, you probably have some questions about the process, especially: how long will it take?

The entire solar installation process usually takes around 6 months. Installing solar isn't as a quick-turnaround project as you might expect.
