

# How long is the interval between the photovoltaic panel maintenance channels

## Overview

---

According to the Clean Energy Council, it's a good idea to have your rooftop solar system inspected periodically. They suggest doing this every five years. Solar panel maintenance is a key factor to ensure the efficiency, safety, and durability of any photovoltaic installation. Although solar systems have a lifespan of over 25 years and operate quietly and reliably on a daily basis, they are not completely maintenance-free. In fact, proper solar panel. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at [www. National Renewable Energy Laboratory](http://www.NationalRenewableEnergyLaboratory.com), Sandia National Laboratory, SunSpec Alliance, and the SunShot National Laboratory Multiyear Partnership (SuNLAMP) PV O&M Best Practices. Solar panels, the backbone of solar power systems, require regular maintenance and inspection to ensure optimal performance and longevity. Calculate recommended maintenance intervals and create a customized maintenance plan.
