How much does it cost to install a solar power system for individuals

Overview

Most homeowners spend between $12,600 and $33,376 to install a complete residential solar system in 2026, with the national average at $19,873 before incentives. Switch to solar with a system built for you. Join over 8,000 people who received a free, no obligation quote in the last 30 days. Solar panels can lower your electricity bill by 75% or more, but the upfront investment is significant. This typically translates to about $2. Where you live, the number of panels you need, maintenance requirements, and available rebates all determine the final price.
