

# How to clean dirt from photovoltaic panels in winter

## Overview

---

It's essential to clean snow from solar panels promptly to ensure maximum energy generation. Here, we'll explore three safe and effective methods to clean snow from solar panels: using a soft-bristle brush, employing a snow rake, and utilizing warm water or deicing solutions for. This guide will walk you through everything you need to know about dealing with snow on your solar panels, helping you make the best decision for your system and your safety. Heavy, wet snow can cover the modules long enough to block sunlight and push output close to zero until the panels clear. If you get. Dust, dirt, pollen, bird droppings, and other debris can reduce energy output by 15–25%, according to the National Renewable Energy Laboratory.
