

# How to connect the base station mini power supply

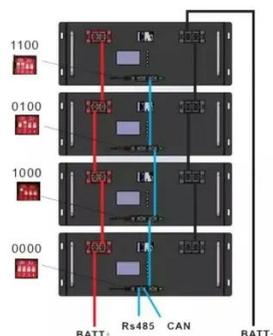

## Overview

---

To set up the Starlink Mini with its power supply, all you have to do is connect one end of the included 50-foot DC power cable to the jack input on the dish and the other end to the adapter. Then, just plug the adapter to an outlet. Please Subscribe, Click the Bell, and if you find this video helpful A few weeks ago I created a simple Starlink Mini pole mount that I attach to my LTV Ladder. Find A Clear View of Sky and Check for Obstructions Your Starlink needs a clear view of the sky so it can stay connected with satellites as they move overhead. Objects that obstruct. If you have access to a standard 100 to 240V AC socket and don't want to buy extra accessories, you can simply use the power supply already included in the Mini kit. Objects that obstruct the connection between your Starlink and the satellite, such as a tree branch, pole. Power your Starlink™ MINI directly from a 12V DC source using the official MINI cable. Eliminate inverter losses and extend runtime with a simple, efficient setup.

## How to connect the base station mini power supply

### Starlink(TM) Mini 12v DC Power kit

Using a high-efficiency DC-to-DC converter (12V to 48V, 240W), the kit connects seamlessly to the Starlink(TM) MINI using the original MINI power cable. No modification is required.
