

How to open the solar inverter safety lock

Overview

If you see a lock symbol in the bottom-right corner of the screen, follow these steps to unlock it. Press and Hold – Simultaneously press and hold the Back and Enter buttons for 5 seconds. Install the Glass Door Clean out the Solar. Lockout Tagout steps must be performed by the technician who will be performing the work using their own (Yaskawa supplied) lockout devices. Step2: Go to your inverter and locate the DC isolator. The need to de-energize the system applies when installing, inspecting, or performing maintenance on. In some cases, Solis S5 50/60kW inverters are shipped with a locked Enter button or display, preventing normal operation.
