

I love inventing barrel wind that can generate electricity

Overview

In this video, a homemade wind power setup made from barrels is featured. It operates by letting the wind spin the barrel structures, which then turns wind energy into electrical energy. This is the story of how I did it. If you have some. Inventive Minds: Inventing Green features the stories of historic and contemporary inventors whose work on socially-responsible technologies creates profound change for the common good. It was a competitive market. Wind energy is one of the cleanest and most promising renewable energy sources of the future and one that best competes with fossil fuel power. Modern wind turbines are.
