

Installing photovoltaic panels using a crane

Overview

Hire a professional crane or boom lift operator (unless you've got a hidden talent/certification for operating heavy machinery—then, by all means, go for it). Secure panels in a lifting harness, pallet, or platform. We were excited to participate in this massive solar panel installation project! We brought our 50-ton crane while Crickey Davis and Beebs helped rig and direct for our operator Kelly, installing the solar panels, and 4. This is not a common method for DIY installers, since it requires expensive equipment with licensed operators. Traditional equipment like crawler cranes and tower cranes faces limitations in confined spaces, complex terrain, and high. In this blog, aimed at the project manager, site supervisor or solar installer, we look at commercial solar panel installation on a high roof (13-14 metres). • Elevated Work Platform (EWP): A.
