

Kuala Lumpur electricity distribution

Overview

Broad networks of transmission lines deliver electricity from these plants to substations close to residential neighborhoods. Then, the power is distributed through underground cables until it reaches individual houses. Electricity flow in a Kuala Lumpur house is a complex. The electricity sector in Malaysia strictly comprises three separate systems, each with their own generation, transmission and distribution networks: one for Peninsular Malaysia, one for Sabah and the adjacent Federal Territory of Labuan, and one for Sarawak. The Grid Code is a regulatory instrument used to coordinate various electricity supply activities of the electricity producer. Malakoff Utilities Sdn. The company is a wholly owned subsidiary of Malakoff Corporation Berhad.
