

# Lima New solar container energy storage system Composition

## Overview

---

Designed to store 450 MWh of clean energy – enough to power 150,000 homes daily – this facility combines lithium-ion battery systems with advanced energy management software. Consider this: Solar and wind farms only produce energy 25-40% of the time on average. Energy storage system container consists of 12 energy storage units. Due to their high capacity and small size, each battery cluster is comprised of 3. That's where the Lima Power Plant Energy Storage Project steps in, tackling renewable energy's Achilles' heel with a 600MWh battery system that's reshaping Peru's energy landscape. Let's unpack how this \$200 million initiative could become the blueprint for sustainable grids worldwide.
