

New Energy Storage Field Growth

Overview

After a historic 2025, when global BESS capacity surpassed 250 GW and overtook pumped hydropower, momentum is set to accelerate in 2026. Key markets are expanding, emerging regions are stepping into the spotlight, and battery storage is increasingly replacing gas generation. This article was written by Nelson Nsitem, Senior Associate, Energy Storage, and Yayoi Sekine, Head of Energy Storage, BloombergNEF. It appeared first on the Bloomberg Terminal. Despite policy changes and uncertainty. Installations passed 100 GW for the first time - a milestone achieved even as some of the largest energy markets grappled with significant policy shifts. What to expect in the. The energy storage sector maintained its upward trajectory in 2024, with estimates indicating that global energy storage installations rose by more than 75%, measured by megawatt-hours (MWh), year-over-year in 2024 and are expected to go beyond the terawatt-hour mark before 2030. Energy Storage Monitor report released today by the American Clean Power Association (ACP) and Wood.

New Energy Storage Field Growth

[Energy storage: 5 trends to look for in 2026 . Wood Mackenzie](#)

What will the year ahead bring for energy storage in the US and China? Will growth continue to accelerate in the Middle East and Europe, where government-led tenders support new ...

[Solar, battery storage to lead new U.S. generating capacity additions](#)

Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

[Global Energy Storage Growth Upheld by New Markets](#)

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector ...

[US energy storage installations grow 33% year-over-year](#)

Storage deployment in the United States grew across all segments and is forecast to grow another 25% in 2025, according to Wood Mackenzie. Across all segments, including ...

[US Energy Storage Installations Reach New Quarterly Record in Q2 ...](#)

Most of the growth was driven by California, Arizona, and Illinois, as attachment rates hit new highs and higher-capacity systems gained market share. Community-scale, commercial and ...

[Energy Storage Rides a Wave of Growth but Uncertainty Looms: ...](#)

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

[Energy Storage and Battery Material Demand Trends , Argus Media](#)

Explore how energy storage growth is driving demand for battery materials, copper, aluminium, and vanadium in the clean energy transition.

[Tesla's energy storage business is growing faster than any other part](#)

Energy storage products like the Megapack, Megablock, and Powerwall drove nearly a quarter of Tesla's gross profit.

[US energy storage market looks resilient amid global growth: BNEF](#)

US energy storage market looks resilient amid global growth: BNEF Despite new foreign sourcing restrictions, reduced policy and trade uncertainty has brightened the outlook for U.S. ...

[Energy Storage Outlook: The expanding role of BESS in global ...](#)

The battery energy storage market continues its rapid growth, reshaping power systems worldwide. After a historic 2025, when global BESS capacity surpassed 250 GW and overtook ...
