

New solar container outdoor power in London

Overview

Transport for London (TfL) has appointed EDF Renewables UK to generate and deliver green electricity for the London Underground network (aka the Tube), via a new solar facility to be built in Longfield, Essex. A new solar facility will be built in Longfield, Essex, by EDF Renewables UK through. Our products are engineered and manufactured in the UK, ready to generate and provide electrical power at the client's premises anywhere in the world. Access to a parts supply chain means that systems can be built quickly, efficiently and without compromise in the UK. When. The Mayor of London, Sadiq Khan, is committed to increasing the amount of solar energy captured in London as part of his wider ambition for London to become a zero carbon city. The Mayor has developed the London Solar Opportunity Map with the UCL's Energy Institute and Centre for Advanced Spatial. BritGreen deployable off-grid unit shown in transport mode (left) and with its fold-out ground-mount solar array deployed (right). Bidders are invited to participate in a competitive tender, which opens.
