

Niue s new solar air conditioning clothing

Overview

Scientists have made solar-powered smart clothing that works like personal air conditioning, they say. Traditional clothing. The utility model relates to a solar air conditioning garment, comprising a garment (1), solar cell panels (2), small air conditioning fans (3), a lithium battery (4) and a charger (5), wherein the soft solar cell panels (2) are arranged on two sides of the shoulder, and are connected with the. At present, Yinlun has established extensive business network in the three strategic development fulcrums in China, North America and Europe, the three most important economies in the world. In the future, Yinlun will expand its business network to a wide area and devote itself to providing. This project aims to enable Niue to generate 80% of its electricity from renewable energy by December 2025. This afternoon marked the groundbreaking ceremony for the Niue Renewable Energy Project Phase 2. The Hybrid Inverter power range is from 3kW to 60kW, compatible with low voltage (40-60V) batteries and high voltage (150-800V) batteries. Many Occasions: This cooling fan jacket is a great choice for any activity that exposes you to high temperatures, such as walking.
