

North macedonia rural microgrids

Overview

The Ministry of Energy, Mining, and Mineral Resources of North Macedonia has embarked on an ambitious project to develop smart electricity grids with support from the European Bank for Reconstruction and Development (EBRD). Microgrids provide resilience, sustainability, and efficient energy solutions by leveraging onsite renewable generation with smart grid resources for better connectivity, decarbonization, and access to energy. 8%, compared to the previous year and the State Statistical Office reported that the renewable energy output for April had reached an impressive 119,821 MWh. Smart siting is a win for climate, nature and communities. This strategic initiative is aimed at bolstering the integration of.
