

# Off-grid solar energy storage cabinet three-phase for island use

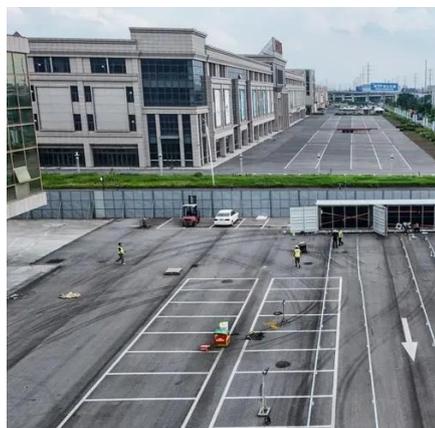

## Overview

---

Supporting off-grid and grid use, it cuts energy costs, boosts efficiency, and ensures reliable backup power for industrial and commercial sites. Designed with a high discharge rate for transformer-based loads, ideal for hotels and C&I projects. The corrosion-resistant stainless steel build ensures durability and longevity, even in the most challenging coastal conditions. This custom. for use after dark or when the grid fails. When the battery is full, excess solar energy is used to power the loads, to charge electric vehicles and in some areas it can be sold back to the grid automatically. Up to 6 units in parallel for capacity extension Parallel operation to form the split phase system or three phase system Support three phase unbalanced power for the output Multi-customized modes can be applied to a variety of application scenarios. Support multiple power sources, such as PV. The client approached E-abel to design and produce a solar battery storage cabinet that not only protects sensitive electrical equipment but also enhances the overall aesthetics and ease of installation. After several rounds of technical discussions and analysis of different kitchen-like equipment. The 350kWh All-in-one C&I Energy Storage Cabinet features a highly integrated design with built-in BMS, EMS, and PCS.
