

Off-grid solar-powered containerized solar panels used in a Lao chemical plant

Overview

A Higher Wire system includes solar panels, a lithium iron phosphate battery, an inverter—all housed within a durable, weather-resistant shell. Our systems can be deployed quickly and easily transported to different locations as project needs change. MOBIPOWER containers are purpose-built for projects where energy demands go beyond what a trailer can deliver. These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells — with optional diesel redundancy when regulatory or client. What is LZY's mobile solar container?

This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations. The on-site installation is undertaken by the Off-Grid Installer team and after all clients are included in the online remote monitoring service. Designed for rapid deployment and all-terrain applications, this self-contained solar system delivers reliable off-grid power to areas where conventional infrastructure is limited, damaged, or non-existent.
