Order Online or Call Us! 888-899-3509. Heavy batteries demand a solar battery box with extra strength and durability. Solar batteries require certain conditions to maintain their productivity and also require air flow. Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. This place is called a "battery enclosure", or what is. MOBIPOWER containers are purpose-built for projects where energy demands go beyond what a trailer can deliver. From system design to factory testing, we size and deliver SolaraBox Mobile Solar Containers that meet site needs reliably and on schedule. A 26,000 m<sup>2</sup> plant handles R&D, prototyping, and full production.
