

Photovoltaic module maintenance support

Overview

This page provides information to assist with the operation and maintenance (O&M) of photovoltaic (PV) systems. Return to the Life Cycle of PV Systems. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at www.nrel.gov. National Renewable Energy Laboratory, Sandia National Laboratory, SunSpec Alliance, and the SunShot National Laboratory Multiyear Partnership (SuNLaMP) PV O&M Best Practices. Maintenance ROI is Substantial: Professional solar panel maintenance typically pays for itself within 2-3 years through improved performance (5-15% increase) and avoided repair costs (\$500-\$2,000 over system lifetime), making it a smart financial investment for 2025. While we often think of solar as a “set it and forget it” technology, proper maintenance ensures systems meet production targets, maintain warranties, and operate. EnergySage helps match you with vetted solar contractors for on-demand maintenance and repairs—plus expert guidance to help you understand the issue and what it will cost.
