

Photovoltaic panel cleaning machine market analysis

Overview

The solar panel cleaning market is projected to grow from USD 1,052.3 million in 2025 to USD 2,987. The solar panel cleaning market is experiencing accelerated growth due to a constellation of interconnected factors. According to the IEA's Photovoltaic Power Systems Programme (PVPS), dust, pollution, and debris on panels cause 4-7% annual energy losses on average, resulting in multibillion euro revenue losses for the solar industry each year if not mitigated through cleaning or preventive measures.
