

Photovoltaic panel lights on for 5 minutes

Overview

To troubleshoot solar lights that persistently stay on, start by checking the light sensor for any blockage or malfunction. Cleaning it may resolve the problem. Next, inspect the solar panel to ensure that it is unobstructed and appropriately charged; dirt and debris can prevent. Seeing your solar lights shining brightly in broad daylight?

This common solar light problem can waste valuable energy and significantly shorten the lifespan of your solar light batteries. I learned this the hard way when my entire pathway lighting system “died” last fall, only to discover a thin film of pollen had cut charging efficiency by 70%. This can be frustrating and unsightly, and it can also make it difficult to enjoy your outdoor space at night.
