

Photovoltaic panel pallet transportation requirements

Overview

Pallets should be at least 1/4 inches wider and 1/4 inches longer than the dimensions of the solar panels. This guide serves as a reference for inspecting, transporting, unpacking, handling and storing LONGi PV solar modules to ensure safe practices for you and the modules. When you need to unpack and install the modules, you can search and download relevant content from Jinko's official website. Adherence to these procedures is essential to maintain product integrity, ensure personnel safety, and comply with. Vertical Orientation: Most factory packagings have panels standing vertically on the long side. Shipping in Less Than Pallet Quantities: Either in your vehicle or to a shipping company in packaged form. Protective Cardboard Corners: Every other panel in the stack has cardboard corners to create a. Accidental breakage and component damage are most common in the shipping and handling stage, and although still only a small chance, the potential for even 1% of product loss due to damage can really add up. Solar panels leaning in transit.

Photovoltaic panel pallet transportation requirements

[How to Protect Solar Panels from Damage Transporting](#)

You can simply take the panels or get them properly packaged in a pallet - for this, leave a note "palletized order" in request comments. Keep in mind that the pallet is a couple of inches ...

[How to Transport Solar Panels Safely and Intact. SolarEnergy](#)

Learn the best practices for transporting solar panels safely. From picking up from the warehouse to choosing a reliable carrier, ensure your panels arrive intact and undamaged.
